# Introduction to Financial EDI

---

Electronic Data Interchange (EDI) is a standardized method for transferring financial transaction data between organizations electronically. In the context of the NVC Global Banking Platform, EDI serves as a critical bridge between traditional banking systems and modern financial infrastructures, enabling seamless integration with financial institutions, payment processors, and regulatory bodies.

## What is Financial EDI?

Financial EDI is the electronic exchange of standardized financial documents between organizations, including:

- Payment orders
- Remittance advice
- Invoice payments
- Account statements
- Credit/debit adjustments
- Fund transfers
- Payment status updates

Unlike manual processes or proprietary formats, EDI uses standardized formats, ensuring interoperability across different systems and institutions, while maintaining the highest levels of security and compliance.

## Benefits of EDI Integration

- **Reduced Processing Time:** Elimination of manual data entry reduces transaction processing time from days to minutes
- **Lower Operating Costs:** Reduction in paper handling, mailing, and manual processing costs

- **Enhanced Accuracy:** Elimination of manual data entry errors (Studies show a 30-40% error rate reduction)
- **Improved Cash Flow Management:** Real-time transaction visibility and faster settlement times
- **Regulatory Compliance:** Built-in audit trails and standardized documentation
- **Seamless Integration:** Connect with global financial institutions, clearing houses, and payment networks

## EDI Standards Supported

---

The NVC Global Banking Platform supports multiple EDI standards to ensure compatibility with diverse financial institutions:

### X12 (ANSI ASC X12)

The American National Standards Institute (ANSI) Accredited Standards Committee X12 format is widely used in North America. Our platform supports the following X12 transaction sets:

- **820:** Payment Order/Remittance Advice
- **824:** Application Advice
- **835:** Healthcare Claim Payment/Advice
- **997:** Functional Acknowledgment

### EDIFACT (UN/EDIFACT)

The United Nations Electronic Data Interchange for Administration, Commerce and Transport (UN/EDIFACT) standard is used internationally. Our platform supports:

- **PAYORD:** Payment Order
- **REMADV:** Remittance Advice

- **BANSTA:** Banking Status
- **FINSTA:** Financial Statement
- **PAYEXT:** Extended Payment Order

## SWIFT (ISO 15022/20022)

For international banking transactions, we support SWIFT message types, integrated with our SWIFT messaging module:

- **MT101:** Request for Transfer
- **MT103:** Single Customer Credit Transfer
- **MT202:** General Financial Institution Transfer
- **MT940/MT942:** Customer Statement Messages
- **ISO 20022 (MX)** message types (pacs.008, pacs.009, etc.)

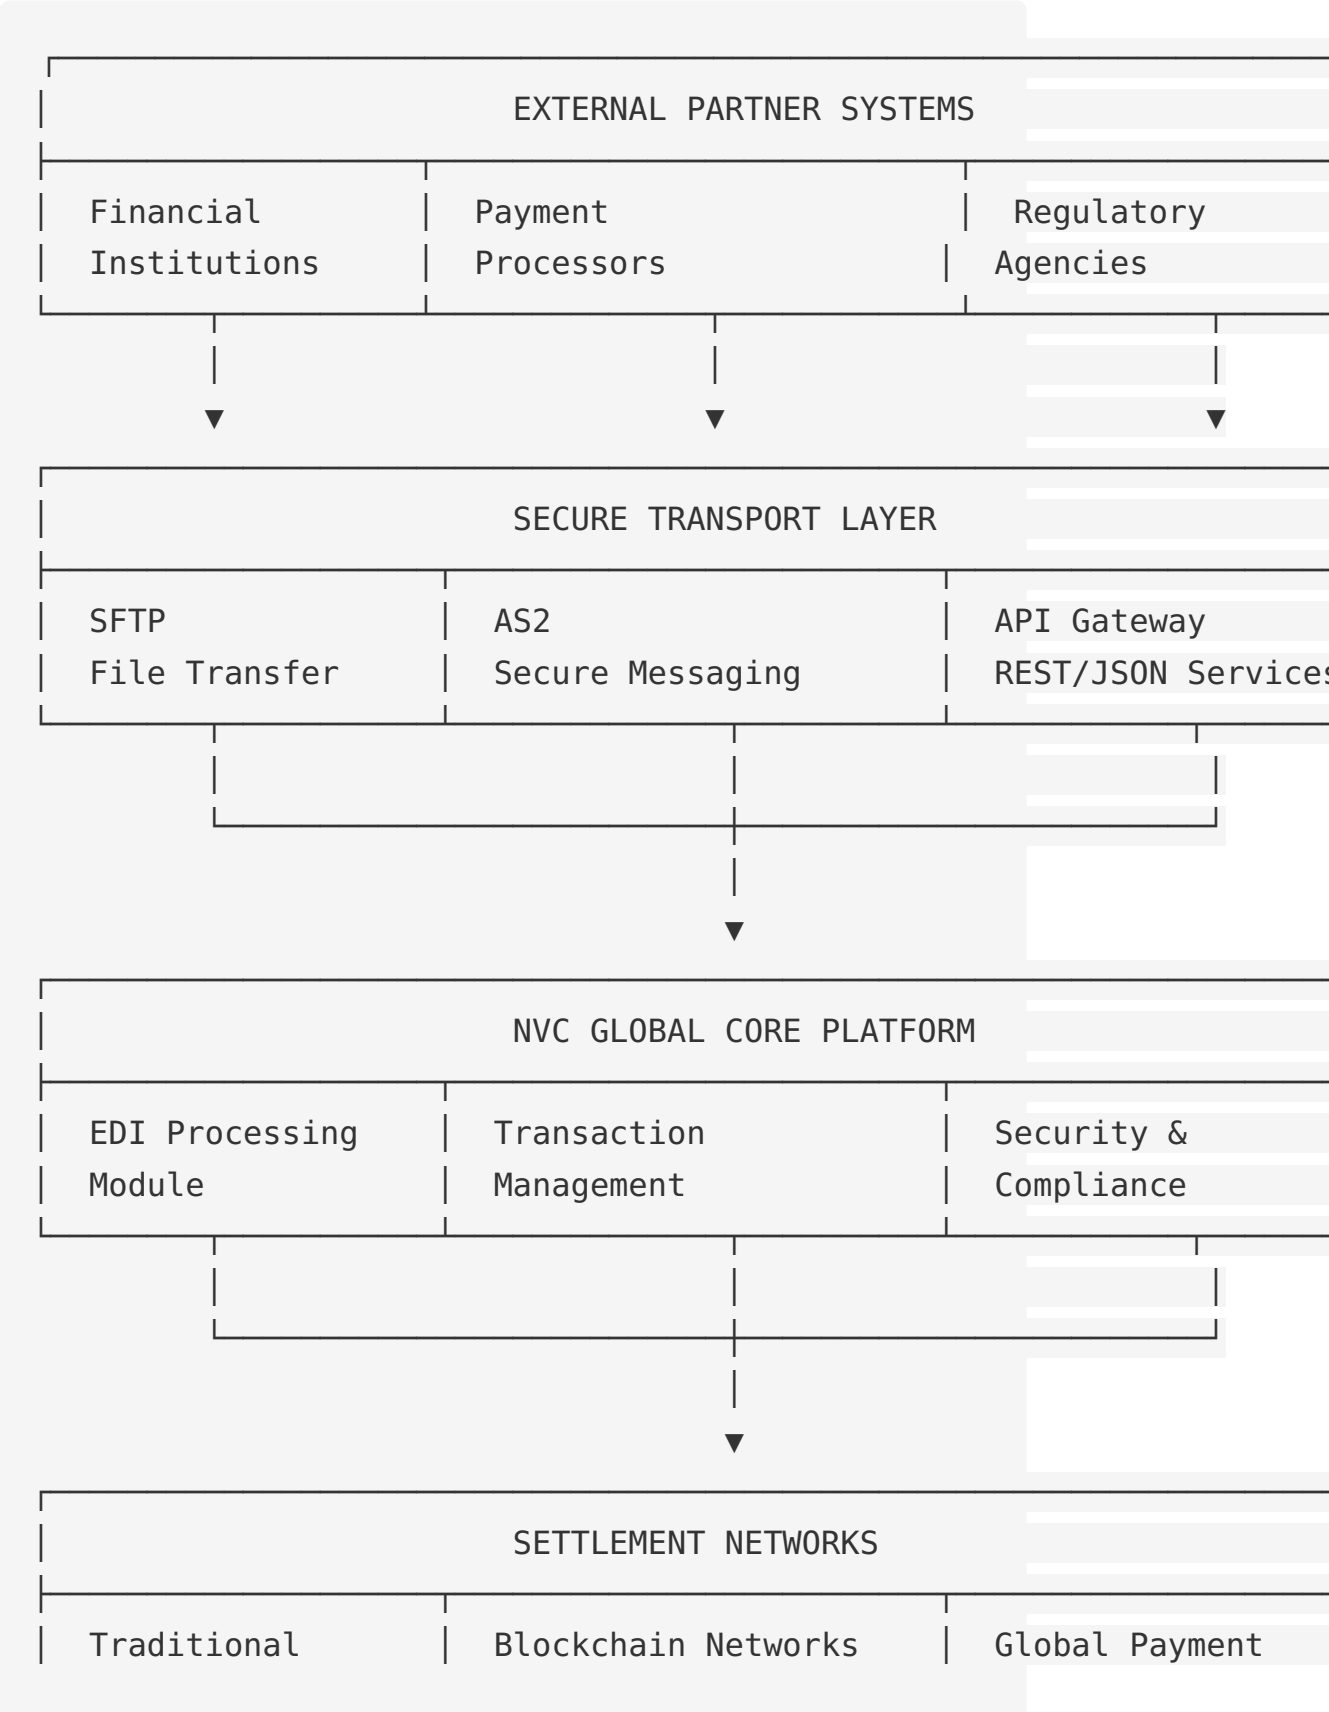

## Integration with NVC Global Banking Platform

---

The NVC Global Banking Platform serves as a central hub for financial EDI processing, connecting your organization with:

1. **Banks and Financial Institutions:** Direct integration with major banks including JP Morgan Chase, Wells Fargo, Bank of America, and international institutions
2. **Federal Reserve:** ACH and Fedwire connectivity
3. **Clearinghouses:** Automated Clearing House (ACH) networks
4. **Payment Networks:** Access to global payment networks
5. **Corporate Partners:** Supply chain and business partner connectivity
6. **Blockchain Networks:** Integration with Ethereum and XRP Ledger for digital settlement options

# NVC Global EDI Architecture Overview

## Getting Started with EDI

---

### Access the EDI Management Dashboard

The EDI Dashboard can be accessed from three locations:

1. **Main Navigation:** Click the "EDI" dropdown in the main navigation bar
2. **Admin Menu:** For administrators, select "EDI Management" from the Admin dropdown
3. **Resources Menu:** For all users, select "EDI Services" from the Resources dropdown

### EDI Dashboard Overview

The EDI Dashboard provides a comprehensive view of:

- Configured partner institutions
- Recent EDI transactions and their status
- Error reports and notifications
- System status and connectivity checks

## Partner Configuration

---

### Adding a New EDI Partner

1. Navigate to EDI Dashboard > Partner Institutions > Add New Partner
2. Provide the following information:
3. **Partner Name:** Legal name of the institution

4. **Partner Code:** Unique identifier (often provided by the partner)
5. **EDI Format:** Select X12, EDIFACT, or custom format
6. **Connection Type:** SFTP, AS2, or API
7. **Connection Details:** Server information, credentials, and security settings
8. **Transaction Types:** Specify which transaction types this partner can process

## Connection Types

The NVC Global Banking Platform supports multiple secure connection methods:

### SFTP (Secure File Transfer Protocol)

- Requires: Hostname, port, username, password/key, directory paths
- Best for: High-volume batch transfers
- Security: SSH encryption and key-based authentication

### AS2 (Applicability Statement 2)

- Requires: Partner URL, certificates, sender/receiver IDs
- Best for: Real-time transfers with immediate acknowledgments
- Security: HTTPS with digital signatures and encryption

### API Integration

- Requires: API endpoint URLs, authentication credentials, webhook configurations
- Best for: Real-time transactional data with instant processing
- Security: OAuth 2.0, API keys, and TLS encryption

# Transaction Types

---

Our platform supports several EDI transaction types, each serving different financial needs:

## **EDI\_PAYMENT**

General payment transactions using EDI formats. Suitable for:

- Vendor payments
- Customer refunds
- Miscellaneous disbursements

## **EDI\_ACH\_TRANSFER**

ACH-specific transactions conforming to NACHA formats:

- Direct deposits
- Direct payments
- Business-to-business payments
- Consumer bill payments

## **EDI\_WIRE\_TRANSFER**

Wire transfer instructions via EDI:

- High-value transactions
- Time-sensitive payments
- International transfers
- Central bank settlement

## **Creating an EDI Transaction**

1. Navigate to EDI Dashboard > Transactions > Create New Transaction
2. Select the transaction type and partner institution
3. Enter transaction details (amount, recipient, purpose, etc.)

4. Review and submit the transaction
5. The system will generate the appropriate EDI format and submit to the partner

## Security and Compliance

---

### Data Protection

All EDI communications are secured using:

- TLS 1.3 for in-transit encryption
- AES-256 for stored transaction data
- Digital signatures for transaction integrity

### Compliance Features

The NVC Global Banking Platform's EDI functionality maintains compliance with:

- **OFAC**: Automatic screening against prohibited parties
- **PCI DSS**: For payment card-related data
- **GLBA**: Financial privacy requirements
- **SOX**: Audit trail maintenance
- **BSA/AML**: Suspicious activity monitoring

### Audit Trails

All EDI transactions maintain comprehensive audit trails including:

- Transaction creation timestamp and user
- All status changes with timestamps
- Delivery confirmations
- Acknowledgment receipts
- Error notifications and resolution steps

# Troubleshooting

---

## Common Issues and Resolutions

Issue	Possible Cause	Resolution
Connection Failed	Server unavailable or incorrect credentials	Verify connection settings and server status
Invalid Format	EDI format does not match partner requirements	Review format specifications and validation rules
Rejected Transaction	Business rules violation at partner institution	Check error codes and review transaction details
Missing Acknowledgment	Communication issue after submission	Verify receipt status and contact partner if necessary

## Error Code Reference

The platform provides detailed error codes for troubleshooting:

- **EDI-001**: Connection error
- **EDI-002**: Authentication failure
- **EDI-003**: Format validation error
- **EDI-004**: Partner rejection
- **EDI-005**: Timeout error
